Shipping guidelines to submit with your sample

- Fill out the Chain of Custody (COC) form/ Sample submission form which is to be sent along with samples correctly and accurately.
- Keep a copy for your records
- Samples are recommended to be sent in black plastic bags. Make sure not to contaminate inside of the bag with skin, dirt or any form of debris (this helps to ensure accuracy of data results).
- Affix a label on them with the sample name, date and analysis requested for
- All the plates, slants and tubes must be sent sealed with parafilm
- Must be sent packed along with proper cushioning material (such as bubble wrap) to prevent breakage
- For soil sediment samples, freeze drying is the preferred preparation, but if this is not possible try to keep the samples, moist, cool and stored in darkness. Avoid air drying!
